Costa Rica	ARA Tours	Since 1 st of August 2020	Until March, 31 st 2022, the only requirement to enter Costa Rica is the completion of an online health form 72h before departure. A Corona test is not required for entry: Until then: guests who are not fully vaccinated need to upload a proof of insurance for 50,000 USD, which also applies in case of COVID-19 disease, as well as a quarantine insurance for 2,000 USD per person. Children under the age of 18 do not have to provide this proof of insurance. Although the entry of unvaccinated guests from 12 years onwards is possible until March, 31 st , the access to hotels, restaurants, tour operators and other shops within the country is partly restricted. The QR code which is generated by the online health form entitles access to hotels, restaurants, tour operators and other shops. Approved vaccines are: Pfizer & BioNTech, Moderna, AstraZeneca, Johnson & Johnson, Sinovac, Sinopharm and Covaxin. From April, 1st 2022, the health form is no longer required. Entry will be as normal as before the pandemic. Non-vaccinated guests don't have to provide any proof of insurance. All capacity restrictions for unvaccinated guests are lifted.	Check of the QR-Code received after filling in the online health form, eventually individual clarification of the insurance cover in case of guests who are not fully vaccinated and health status in case of showing symptoms.	The only continuing measure is the compulsory wearing of masks in closed rooms until further notice. Dominican Republic	Caribbean Tours	All airports and tourist activities in the Dominican Republic have reopened, including the reactivation of air routes from Europe, Latin America, Canada and the United States.	Travelers are not required to present a negative test result for COVID-19 upon arrival. However, rapid tests will be conducted on randomly selected travelers upon arrival. Passengers under five years of age and crew members are exempt from this requirement.	To save time in the arrival procedure, we recommend filling out the entry form 72 hours before travel, printing out the QR code or taking a screenshot of it and keeping it ready until arrival, where it will be scanned by the authorities when the passenger is going through customs. Passengers must fill out one form for arrival and one form for departure and the system will generate two QR codes. The QR code will not be scanned upon departure, but it is confirmation that the form has been filled out correctly. If you want to make a change to the form, you will have to fill it out again. Until April 30, 2021, the Dominican authorities exceptionally accept both types of registrations for entry into the country: the previous one via physical forms and the new one via the digital system. From May 1, 2021, the use of digital forms will be mandatory and no other method of providing the information required to enter the Dominican Republic will be allowed or recognized as valid. The Dominican airports have free internet access so that passengers who have not completed the form before the flight can do so when they arrive in the country. For more information and an instruction video, please visit: https://viajerodigital.mitur.gob.do/ .	All airports, ports and tourist activities in the Dominican Republic have reopened. In addition to most all-inclusive hotels, most national parks and beaches have also opened. There are a few private resorts and small hotels that have not yet recovered 100% from the pandemic, but these can be requested individually.	All airports are open	<p>Iberia: MAD-SDQ</p> <p>Lufthansa: FRA-PUJ + FRA-SDQ</p> <p>Edelweiss: ZRH-PUJ + ZRH-POP</p> <p>Air France: CDG-PUJ</p> <p>Condor: Resumption not yet confirmed</p>	We can discuss the various options with tour operators and agencies basing on our GTC and cancellation policy before check-in. We will make sure to be as flexible as possible.	drtravelcenter.com
